

FOR IMMEDIATE RELEASE

Dr. Lawrence P. Chong Named Top Doctor

Dr. Lawrence P. Chong has been named one of America's Top Doctors by Castle Connolly

Huntington Beach, Calif., January, 10, 2016 — VMR Institute, a leading facility for treatment of disorders of vitreous, macula, and retina in the Los Angeles and Orange County areas, announced today that Dr. Lawrence P. Chong has been selected, by his peers as well as Castle Connolly's physician-led research team, as one of America's Top Doctors. This honor is bestowed only upon those deemed the best in their specialties, as well as in the communities they serve.

"I am honored to have been named one of America's Top Doctors by Castle Connolly as well as my peers again in 2016," said Dr. Chong. "I am very fortunate to have the ability to help others, so to be recognized for that is extremely humbling."

Each year, Castle Connolly conducts a survey of physicians and healthcare professionals, asking them to identify excellent doctors in each specialty in their region, and throughout the nation. The physician-led research team then conducts interviews with chairs of clinical departments, as well as presidents of medical affairs, in order to ascertain the top specialists in their field. The research team bases its appointments on criteria such as medical education, training, hospital appointments, administrative posts, achievements, disciplinary and malpractice history, as well as interpersonal skills such as listening and communicating positively, showing empathy, educating, and instilling trust and confidence.

About Connolly Medical

Connolly Medical, Ltd is a research and information company established to help people find the best healthcare. It provides healthcare consumers with an invaluable source of information to identify the top doctors in their own communities. By identifying excellent, caring doctors in every community hospital in our regional guides, we apprise consumers of the best healthcare available to them within their own communities and across the nation.
